With the New Year come new styles and inventions. Fromment among these ranks our new Stem Winding Watch, named "Old 1858." Although heretofore we have always handled trin also watch of each kind that it was presible to get, yet it has been impossible to get always handled trin also watch of each kind that it was presible to get, yet it has been impossible to get a low proced watch, with the stemwinding attachment, that could be relied upon for time, and have a finished appearence. This seems to have been accomplished by the inventor of "Old 1878." We need only refer you to the cut given in connection with this, which is an exact imitation of it, and say that it is perfect in every way. The works are covered with a heavy plate glass cap, then this it covered with a heavy plate glass cap, then this it covered with a heavy plate glass cap, then this it covered with a heavy plate glass cap, then this it covered with a heavy plate glass cap, the face is a late glass cap or crystol ¼ of an inch thick, get is a heavy rim one-half an inch in width, making it almost impossible to injure the watch.

It is fitted especially for Hashroad, farm and shop unes, where dust and dirt are insile to get in on opening. As the cases fit very closely, and being a strem-winder and open dist, it need never be opened. If you need a watch, ity his, It is entirely new and novel. You can rely on it for time. Fun will be the only one in your neighborhood having such a watch. It looks exactly like gold and will save its cost in a few years, by saving what you would have to pay for repairs on an ordinary watch.
